## Industrial Blends

# Industrial Blends

By industrial blends (Prepared Edible Fat) we mean

- **butter blends**
- **AMF blends**
- **cream blends**

We blend butter, AMF or cream with vegetable oil/fat. We can also add other ingredients like sugar to optimize:

- **functionality**
- **taste**
- **ease of use**
- **price**

Butter blends are produced using inline processing equipment to add multiple dry and liquid ingredients.

## Application areas

There are numerous applications possible using our blends. A few examples are: margarine, ice cream and other dairy products, bakery products and chocolate.

## Packaging

The various products we supply come in tins, drums and bulk or in 10 – 25 kg PE foil wrapped blocks (in cartons). Frozen conditions are optional.

## Campina Buttergold

Campina Buttergold is a leading supplier of milk fat based solutions for the food industry. Our ability to add taste and functionality to your products is based on over 25 years of experience. We are part of the leading Dutch dairy co-operative Campina, ensuring our reliability in matters of supply. Excellent ingredients and extensive knowledge of applications make us the right partner with whom to develop your business.
